

Melissa Craig | Data Manager

Melissa Craig joined CHAD in July of 2000. Melissa's role at CHAD includes managing the Uniform Data System information on community health center members and managing secondary data for both members and interested communities. Other duties include data collection and analysis and providing assistance to members and communities.

Melissa is a graduate of Bismarck State College in Bismarck, North Dakota, with an associate's degree in information processing. She completed her Bachelor of Science degree in business administration with an emphasis on information systems from Minot State University in December 2008. Melissa and her husband live in Bismarck with their two sons.
