

ZACHARY CLARE-SALZLER

Data Analyst and Reporting Coordinator, Partnership Health Center

Zak Clare-Salzler is the data analyst and reporting coordinator at Partnership Health Center (PHC), a federally qualified health center in Missoula, MT. Over the last three years at PHC, Zak has played an integral role in implementing Azara DRVS. He regularly works on data-driven projects to improve clinical quality, inform management decisions, and drive equity-based care. Zak presented PHC's approach to collecting and utilizing social determinants of health data at the

2021 Azara User Conference and was invited to speak on the same topics in webinars for the Montana Primary Care Association and the Mississippi Health Safe Net (HCCN).

Prior to joining the team at PHC, Zak received a Master of Science in evolutionary biology and genomics from the University of Montana and a bachelor's degree in ecology from Dartmouth College. In his free time, Zak enjoys spending time outside rock climbing, mountain biking, and skiing with his husky, Stan, or crafting a tasty meal in the kitchen.
