

Using Data Analysis to Drive Health Equity

The Health Center Experience

CHAD Conference

September 14, 2021

Zak Clare-Salzler

www.partnershiphealthcenter.org

Outline

1. Principles of data analysis
2. Gathering data and how to approach PRAPARE
3. Azara DRVS functionality
4. Azara DRVS PRAPARE module
5. Breakout session
6. COVID-19 vaccination equity
7. Questions and ideas

Data for Action

Principles for being data informed

Garbage In, Garbage Out

- Your analysis can only be as good as the data that you start with.

Data In

- EHR data are notoriously messy, lack structure, and can be difficult to access.
- Striving for *perfect* data may be overly ambitious.
- More important to know the data quality landscape.
- Workflows should empower patient-facing staff while adhering to good data management principles.

Data Out

- Analyses and reports support:
 - Grant funding
 - Program development
 - Outreach and community partnerships
 - Operational and quality improvement
 - Panel management
 - Patient-centered care

Stages of Analytics Development

Excel sheets, basic reporting & financials; not strategic nor systematically supporting improvement projects

Dedicated data analyst, at least one BI tool, simple dashboards

Warehousing, automating, broadening scope

Predicting, correlating, integrating multiple data types quickly

Supporting Analytics Development

- Utilize structured templates and smart forms when possible.
- Reinforce good workflows among staff who add information to patient charts.
- Invest in data analysts, HIT, and data management tools.

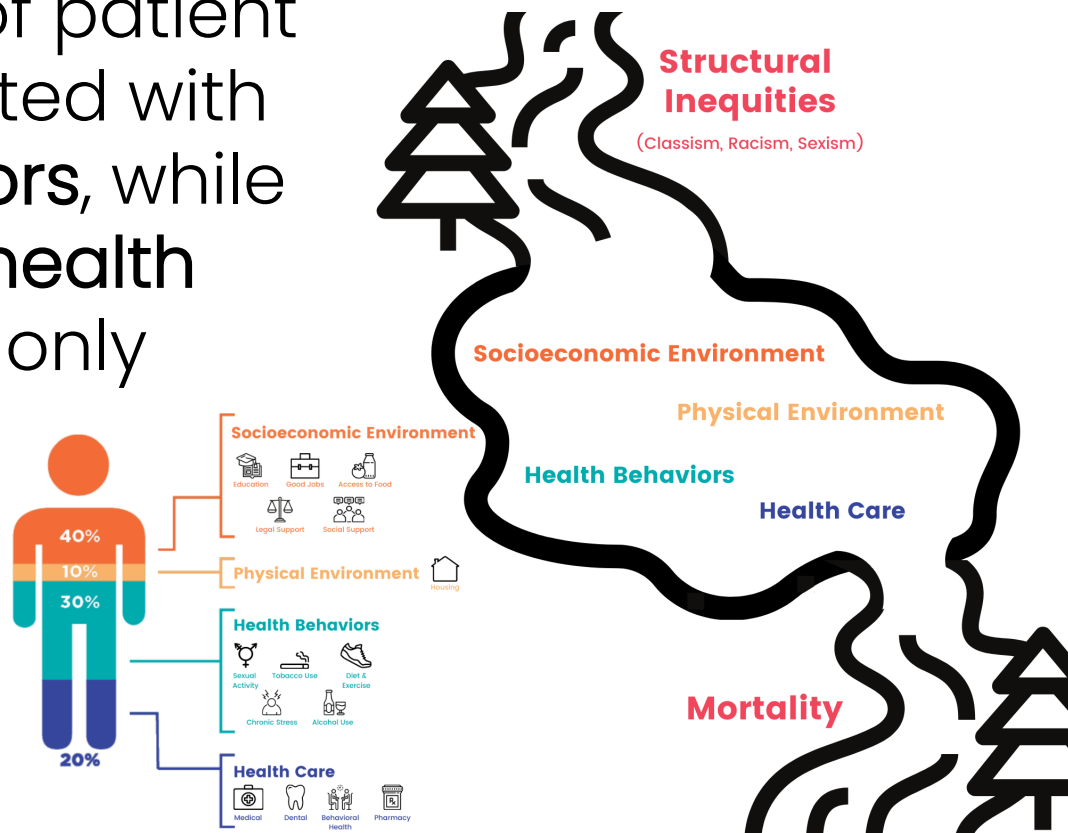

Gathering Data

Guiding values to PHC's approach

Health Is Much More Than Healthcare

- On average, 80% of patient wellness is correlated with SDOH and behaviors, while access to quality health care accounts for only 20%.*

*Institute for Clinical Systems Improvement, Going Beyond Clinical Walls: Solving Complex Problems (October 2014)

Collaborative

- **Toffer Lehnherr**, Health Equity Coordinator, *PHC*
- **Alana McCreery**, Community Health Specialist, *PHC*
- **Becca Goe**, Director of Innovations, *PHC*
- **Ariel Singer**, *Oregon Primary Care Association*
- **Stephanie Castano**, *Oregon Primary Care Association*

June 2020 PRAPARE Pilot

- Community Health Workers called patients with addresses in a specific lower-income city neighborhood.
- This pilot informed CHWs *HOW* to administer the PRAPARE screener.

Key Values

- Trauma-informed Care
- Free, Prior & Informed Consent
- Empathic Inquiry

Trauma-informed Care

- Not accomplished through any single particular technique or checklist
 - Prevalence of trauma
 - Impact of trauma on health and engagement to services
 - Current service systems can re-traumatize individuals

Free, Prior & Informed Consent

- Free
- Prior
- Informed
- Ongoing

Empathic Inquiry

- Guided discussion
 - Open-ended questions
 - Active listening
 - Self-disclosure
- Allow people to draw their own conclusions without judgement

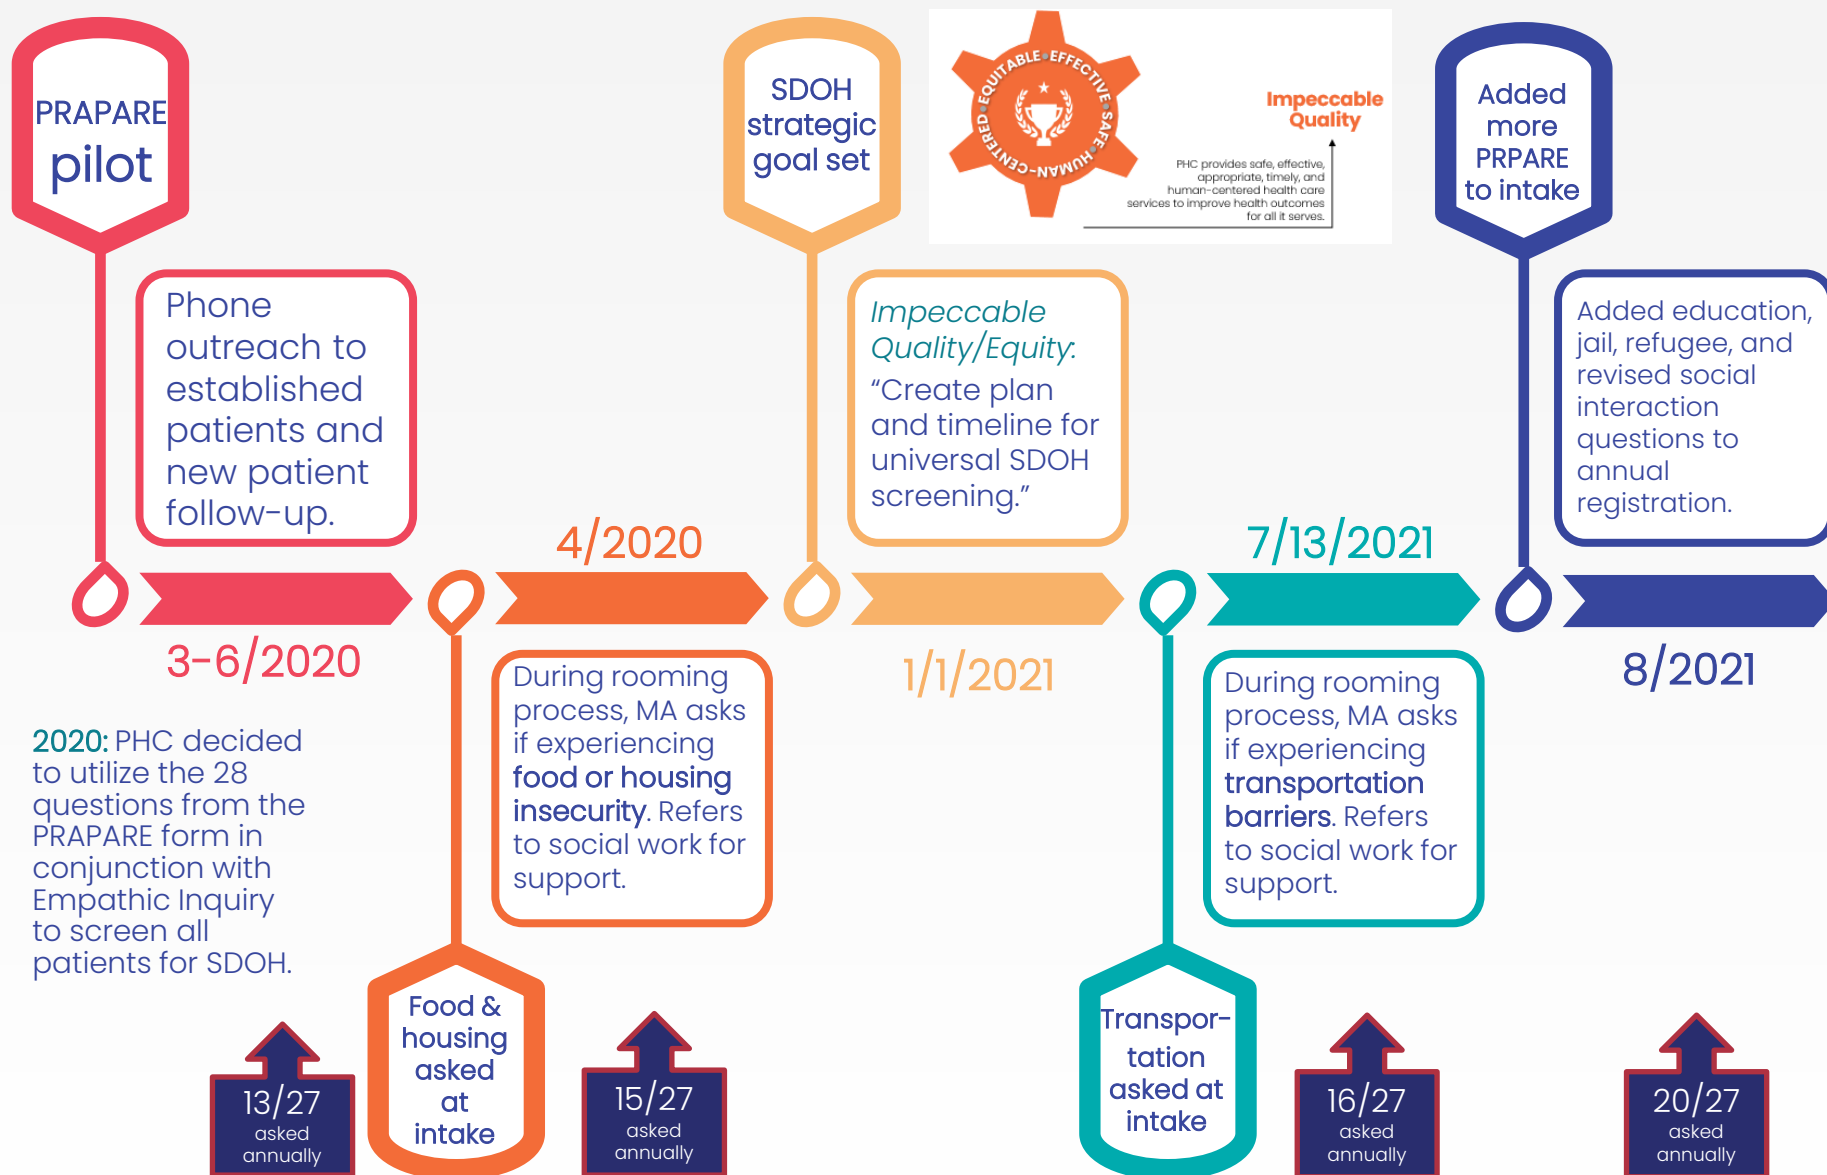

Empathic Inquiry

- Strengths-based framework
 - Resiliency
- Respectful
- Curious
- Compassionate
- Safety
- Self-determination / agency

Values into Practice

- Develop a script
 - Practice with co-workers
- Iterative process
 - What will work for your communities?

PHC's PRAPARE Journey

Next Steps Toward Universal PRAPARE Screening

- *September:*
 - Integrate social work students utilizing PRAPARE.
 - Enhance transportation resources.
- *October:*
 - Define technology & personnel roles for annual patient screening that includes remaining seven PRAPARE questions.
- *Future:*
 - Reinforce use of the PRAPARE smart form in EHR and enhance referrals to social work dept., community resources.

None?

- Measures can be disaggregated into patient groups.
 - Group comparisons can reveal health disparities and inform quality improvement and operational initiatives.

Filtering

- Measures can be filtered on a number of variables.
 - For example, patients with medical transportation barriers.

PRAPARE Module

- DRVS PRAPARE module includes measures, dashboards, and a registry:
 - (2) Measures
 - SDOH Assessment Done, SDOH Core Screening
 - (2) Dashboards
 - Social Needs All Patients, Social Needs Assessed
 - (1) Registry

PRAPARE Module Measures

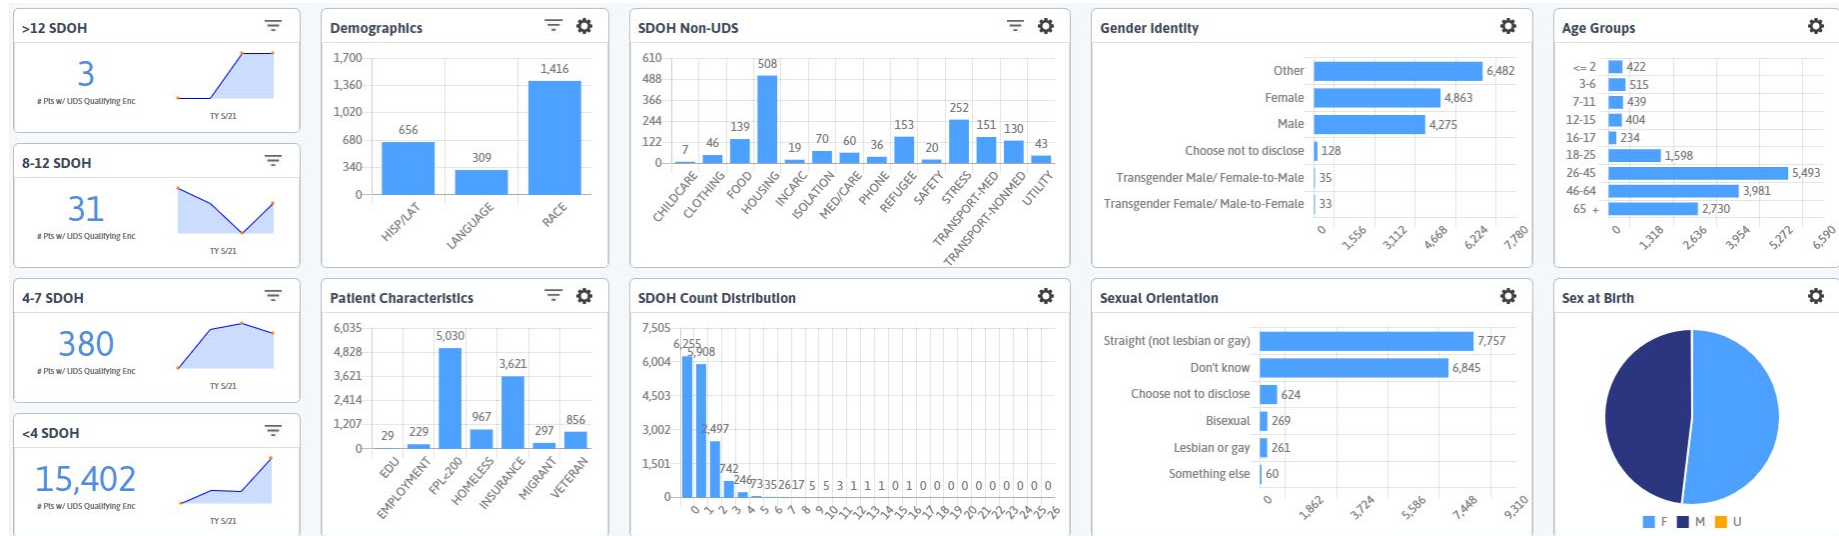

- *Social Determinant of Health Assessment Done:*
 - Numerator
 - Patients with a completed health related social needs assessment – defined by clinic.
 - Denominator
 - Patients with a UDS qualifying encounter.

PRAPARE Module Measures

- *Social Determinant of Health Core Criteria Screening:*
 - Numerator
 - Patients with social needs assessments that include: Food, housing status, transportation, utility insecurity, and either employment, education, domestic violence, or social integration.
 - Denominator
 - Patients with a UDS qualifying encounter.

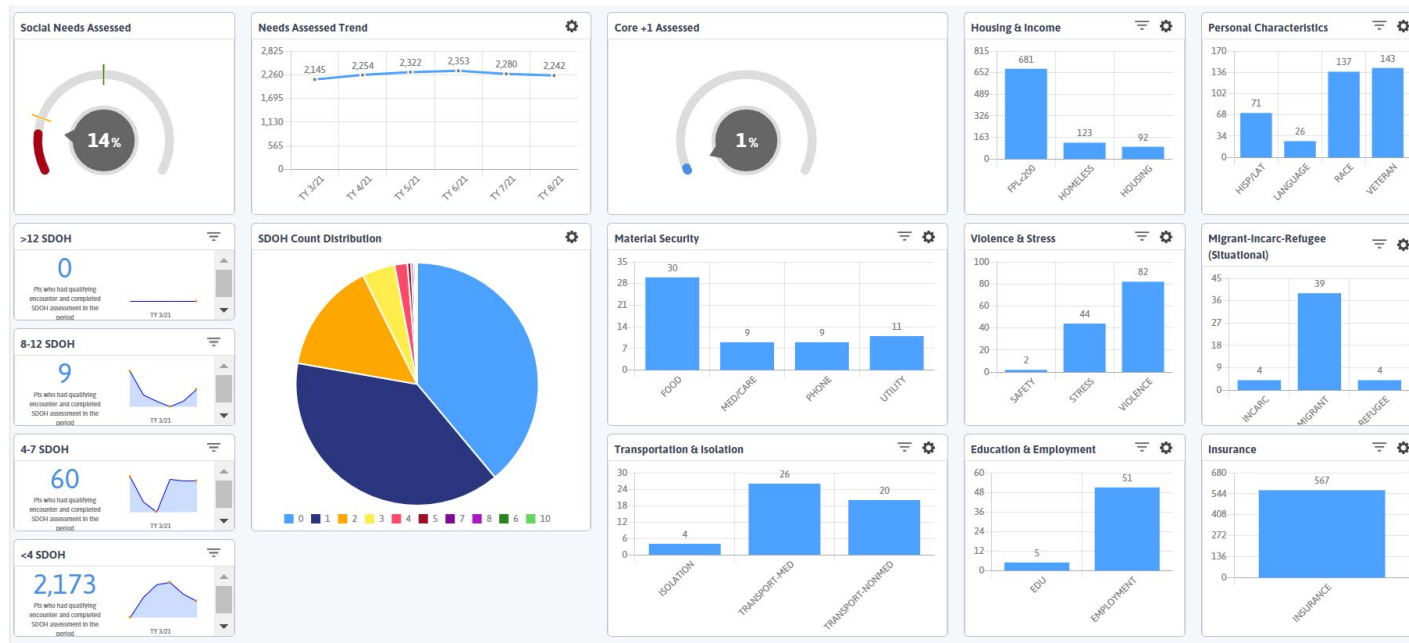

PRAPARE Module Dashboards

- *Social Needs All Patients*
 - Overview of SDOH documented in whole patient population.

PRAPARE Module Dashboards

- *Social Needs Assessed*
 - Overview of social needs screenings occurring in clinic.
 - Monitor how well clinic is screening the population.

PRAPARE Module Registry

- Population management tool centered on SDOH data.
- Registries list sets of data elements for each patient.

Breakout Session (10 minutes)

- Along the stages of analytics development, where do you see your organization?
- Do you collect SDOH data? What questions do you ask and how?
- What are lessons learned?
- Where do you see a tool like DRVS facilitating analytics development and patient equity?
