

## Austin Hahn | Data and Health Information Program Manager

Austin Hahn joined CHAD in December 2022 as the data and health information program manager, where he does data management, IT security and policy, and IT administration. Currently, he participates in coaching calls on leveraging HIT and data, focusing on clinical quality, patient-centered care, provider and staff well-being, and enhancing virtual care. He also collaborates with partner organizations to advance the strategic priorities of the Great Plains Health Data Network. Prior to CHAD, Austin worked for Avera Health as a technology intake developer, analyzing and evaluating IT products and services.

Austin has bachelor's degrees in business administration and business management from the University of Sioux Falls. He lives in Sioux Falls with his wife, Amanda, two sons, Syllas and Elliott, and a dog named Oats. He enjoys the outdoors and exploring new places, ideas, and hobbies. He spends time sailing, cycling, woodworking, and geocaching with family and friends.
